Introduction Biological treatment is an important and integral part of any wastewater treatment plant that treats wastewater from either municipality or industry ...

### **Biological Wastewater Treatment**

Introduction. Sludge originates from the process of treatment of waste water. Due to the physical-chemical processes involved in the treatment, the sludge tends to concentrate heavy metals and poorly biodegradable trace organic compounds as well as potentially pathogenic organisms (viruses, bacteria etc) present in waste waters.

Septage or "septic tank sludge" is partially treated sludge that is accumulated and stored in a septic tank or similar onsite sewage facility. Septage is a by-product from the pretreatment of household wastewater in a septic tank. After a few years of accumulation, septage is usually pumped out of a septic tank by a vacuum truck. Septic tanks are receiving blackwater from flush toilets, as well ...

The Buffalo Creek flood was a disaster that occurred on February 26, 1972, when the Pittston Coal Company's coal slurry impoundment dam #3, located on a hillside in Logan County, West Virginia, burst, four days after having been declared "satisfactory" by a federal mine inspector.. The resulting flood unleashed approximately 132,000,000 US gallons (500,000 m<sup>3</sup>) of black waste water, cresting ...
