Architecture is both the process and the product of planning, designing, and constructing buildings or any other structures. Architectural works, in the material form of buildings, are often perceived as cultural symbols and as works of art. Historical civilizations are often identified with their surviving architectural achievements.

Overview. The SOA reference architecture provides a blueprint for "fractal scope," from an ecosystem architecture to an enterprise or application architecture and is based on establishing the building blocks of SOA: services, components, and flows that collectively support business processes and goals.

Software Architecture typically refers to the bigger structures of a software system, and it deals with how multiple software processes cooperate to carry out their tasks. Software Design refers to the smaller structures and it deals with the internal design of a single software process. By the end of this tutorial, the

readers will develop a sound understanding of the concepts of software ...

### **Software Architecture and Design Tutorial**

The architectural style and principles. The architecture style defining a SOA describes a set of patterns and guidelines for creating loosely coupled, business-aligned services that, because of the separation of concerns between description, implementation, and binding, provide unprecedented flexibility in responsiveness to new business threats and opportunities.
