and their code numbers were adapted by BEA from the 2017 North American Industry Classification System (hereafter referred to as the "2017 NAICS"). Industry classifications in the previous version of this guide were adapted from the 2012 North American Industry Classification System.

Guide to Industry Classifications for - bea.gov

The FALCON is a unidirectional motion sensor optimizing the performance of automatic doors. The FALCON detects every type of target and can filter people. Detecting vehicles only allows to reduce the door closing cycle by rejecting cross-traffic. Mounted at 7 m the FALCON has a detection field of 4 x 5 m.

FALCON | BEA Europe

BEA's Falcon family of sensors is the premier microwave activation solution for indoor and outdoor industrial applications. The family includes the Falcon, Falcon XL (extra low mount) and Falcon Wide (for wide detection areas). BEA's Falcon family is ideal for automatic industrial

BEA's Falcon family is ideal for automatic industrial doors, vehicle gates/barriers, vehicle detection, loading docks or any other industrial application where motion detection is required. Housed in a NEMA 4 rated enclosure, the Falcon family is designed to operate in harsh environments.

Amazon.com: BEA 10FALCONW: Home Improvement

Falcon is compatible with multiple industrial applications; roll-up door, high speed door, cold storage door, industrial sliding door or warehouse doors. Sensor can be set vertically from 0 degrees to 180°. An optional extension bracket allows the Falcon to be mounted up to 3 ft. away from the face of the door.

Falcon The world's only sensor capable of parallel traffic

The Bureau of Economic Analysis (BEA) first provided regional input-output multipliers in the early 1970s as a tool to help economists analyze the potential impacts of economic activities on regional

economies—for example, the construction of a new sports stadium or a new manufacturing plant.
