net.sf.jasperreports.allow.element.negative.width: A property that determines whether elements having negative width values are allowed. If this value is set to false, the report is verified not to contain elements with negative width values. This is useful when the report is meant to be exported to grid-based formats such as HTML, XLS or CSV, which might enter an infinite loop.

Tip: To write a good alt text, make sure to convey the content and the purpose of the image in a concise and unambiguous manner. The alt text shouldn't be longer than a short sentence or two – most of the time a few thoughtfully selected words will do. Do not repeat the surrounding textual content as alt text or use phrases referring to images, such as, "a graphic of" or "an image of."

Although the term embedding is used for some explicit formatting characters, the text within the scope of the embedding formatting characters is not independent of the surrounding text. Characters within an embedding

can affect the ordering of characters outside, and vice versa. This is not the case with the isolate formatting characters, however.
