basic physics course which, in effect, states that the forces pulling on a rope strung between two poles becomes infinite as the rope becomes straight. ! Fig. 2. Following the cosine law, as the string AB becomes straight, the vector (c) becomes infinite. Applying that principle to the 'Iron Cross', creates another mathematical absurdity.

Biotensegrity is a structural design principle that describes a relationship between every part of an organism and the mechanical system that integrates them into a complete functional unit. It is a conceptual model that is causing a paradigm shift in biomechanical thinking and changing the way that we think about functional anatomy.
