Breast Cancer Facts & Figures | American Cancer Society

Breast cancer is cancer that develops from breast tissue. Signs of breast cancer may include a lump in the breast, a change in breast shape, dimpling of the skin, fluid coming from the nipple, a newly inverted nipple, or a red or scaly patch of skin. In those with distant spread of the disease, there may be bone pain, swollen lymph nodes, shortness of breath, or yellow skin.

Breast cancer - Wikipedia

Breast cancer is the most common cancer among American women.; One in every eight women in the United States develops breast cancer.; There are many types of breast cancer that differ in their capability of spreading (metastasize) to other body tissues. The causes of breast cancer are not yet fully known, although a number of risk factors have been identified.
