

business process re engineering pdf

Business process reengineering (BPR) is an approach to change management in which the related tasks required to obtain a specific business outcome are radically redesigned. An important goal of BPR is to analyze workflows within and between enterprises in order to optimize end-to-end processes and eliminate tasks that do not provide the customer with value.

What is business process reengineering (BPR)? - Definition

A business process or business method is a collection of related, structured activities or tasks by people or equipment which in a specific sequence produce a service or product (serves a particular business goal) for a particular customer or customers. Business processes occur at all organizational levels and may or may not be visible to the customers.
