Category theory formalizes mathematical structure and its concepts in terms of a labeled directed graph called a category, whose nodes are called objects, and whose labelled directed edges are called arrows (or morphisms). A category has two basic properties: the ability to compose the arrows associatively, and the existence of an identity arrow for each object.

Creationism is the religious belief that the universe and life originated "from specific acts of divine creation", as opposed to the scientific conclusion that they came about through natural processes. Creationism covers a spectrum of views including evolutionary creationism, a theological variant of theistic evolution which asserts that both evolutionary science and a belief in creation are ...
