People facing different levels of water scarcity. The number of people facing low, moderate, significant, and severe water scarcity during a given number of months per year at the global level is shown in Table 1. We find that about 71% of the global population (4.3 billion people) lives under conditions of moderate to severe water scarcity ( $WS > 1.0$ ) at least 1 month of the year.

Ecology; Ecology addresses the full scale of life, from tiny bacteria to processes that span the entire planet. Ecologists study many diverse and complex relations among species, such as predation and pollination. The diversity of life is organized into different habitats, from terrestrial (middle) to aquatic ecosystems.

Despite the links between ERGO and GSH, there is limited data regarding the impact of mushroom consumption on GSH levels. In one study, dietary intake of mushroom extracts increased GSH levels, in various organs, in rats (Jayakumar, Thomas, Ramesh, & Geraldine, 2010). Further, there is little information available regarding mushrooms as a potential source of GSH itself.

On December 29, 2010, the U.S. Environmental Protection Agency established the Chesapeake Bay Total Maximum Daily Load (TMDL). The TMDL is a historic and comprehensive "pollution diet" to restore clean water in the Chesapeake Bay and the region's streams, creeks, and rivers. A number of elements are ...

The fungus *Podosphaera xanthii* causes powdery mildew, a disease that has serious negative effects on the production of melon (*Cucumis melo* L.) worldwide. In this study, an F2 melon population, derived from a cross between a resistant (MR-1) and a susceptible cultivar (Top Mark), was used for excavation of major powdery mildew resistance genes by bulked segregant analysis (BSA).

The year 2012 involved many significant scientific events and discoveries, including the first orbital rendezvous by a commercial spacecraft, the discovery of a particle highly similar to the long-sought Higgs boson, and the near-eradication of guinea worm disease. A total of 72 successful orbital spaceflights occurred in 2012, and the year also saw numerous developments in fields such as ...

The term "tipping point" commonly refers to a critical threshold at which a tiny perturbation can qualitatively alter the state or development of a system. Here we introduce the term "tipping element" to describe large-scale components of the Earth system that may pass a tipping point. We critically evaluate potential policy-relevant tipping elements in the climate system under ...

"Magnetic water and fuel treatment: myth, magic, or mainstream science?" This article, by Mike Powell, a chemical engineer, appeared in the *Skeptical Enquirer* 22(1) 27-31 1998. The author provides a few references, practically all to non-refereed journals and conference proceedings of dubious quality.
