Screening tests are an important part of your preventive health care. The tests can be used for early detection of some of the more common and potentially deadly diseases, such as cancers, diabetes, and heart disease. These tests can find certain illnesses in their earliest and most curable stages, even before you notice symptoms.

The Milgram experiment on obedience to authority figures was a series of social psychology experiments conducted by Yale University psychologist Stanley Milgram. They measured the willingness of study participants, men from a diverse range of occupations with varying levels of education, to obey an authority figure who instructed them to perform acts conflicting with their personal conscience.
