Pulmonary absorption " estimation of effective pulmonary

Computational science (also scientific computing or scientific computation (SC)) is a rapidly growing multidisciplinary field that uses advanced computing capabilities to understand and solve complex problems. It is an area of science which spans many disciplines, but at its core it involves the development of models and simulations to understand natural systems.

Aims and Scope: The "Advances in Computational Design (ACD), An international Journal," aims at providing an excellent publication channel for researchers and practicing engineers in computational design in all the areas of engineering & science. The journal focuses on but not limited to the following areas : " Computer-Aided Design in Engineering, " Computer Graphics and Modeling ...

At a tissue level, ignoring the means of control, morphogenesis arises because of cellular proliferation and motility. Morphogenesis also involves changes in the cellular structure or how cells interact in tissues.

The paper reviews the application of deterministic-stochastic models in some areas of computational electromagnetics. Namely, in certain problems there is an uncertainty in the input data set as some properties of a system are partly or entirely unknown. Thus, a simple stochastic collocation (SC) method is used to determine relevant statistics about given responses.
