The kernel is a computer program that is the core of a computer's operating system, with complete control over everything in the system. On most systems, it is one of the first programs loaded on start-up (after the bootloader). It handles the rest of start-up as well as input/output requests from software, translating them into data-processing instructions for the central processing unit.

The most popular email list building advice is to entice potential subscribers with a free download. But once you've figured out what your freebie is going to be and have your PDF all ready, you're stuck trying to figure out where to upload and link your file so that your subscribers will get it automatically (and no one else will be able to find it without subscribing).
