Special relativity is a theory of the structure of spacetime. It was introduced in Einstein's 1905 paper "On the Electrodynamics of Moving Bodies" (for the contributions of many other physicists see History of special relativity). Special relativity is based on two postulates which are contradictory in classical mechanics: . The laws of physics are the same for all observers in uniform motion ...

These operators will cooperate on a wave function,  $\Psi$ , which is assumed to exist, and which is assumed to contain all that is knowable about the quantum mechanical system. We would then solve the resulting equation to get the particulars. And so, in this example, we can write the substitutions into the classical expression for total energy.

In the USA up to 4 in ten adults use 'some form' of alternative therapy 1. In Britain there are about 150 000 alternative therapists, and the public spend about £4.5 billion on them (as of year 2009) 2. In nearly all practices, they work due to the psychology surrounding 'treatment' (the placebo effect and statistical regression) rather than the actual result of the treatment.
