Laser diodes find wide use in telecommunication as easily modulated and easily coupled light sources for fiber optics communication. pumping other lasers, such as diode-pumped solid-state lasers. Infrared and red laser diodes are common in CD players, CD-ROMs and DVD technology. Violet lasers are used in HD DVD and Blu-ray technology.

In the first semiconductor lasers, the PI has been achieved in a heavily doped forward biased p-n junctions. The pumping current was too high to operate at room temperature in CW-mode P-n junction in equilibrium, ... inside the sample along the junction plane.  $\Gamma^3$  is the laser gain.

Semiconductor laser diodes provide coherent sources of light to an ever-increasing market with applications ranging from the defense industry and medical field through to entertainment and fiber-optic communications and in 2005â€“2007 took approximately 55% of the total laser market by value (\$6.9 billion in 2007) (Steele, 2008).
