of information processing; however, there are many dissensions in reference to specifics on how the brain actually codes or manipulates information as it is stored in memory. Schacter and Tulving (as cited in Driscoll, 2001) state that "œœa memory system is defined

Information Processing and Memory: Theory and Applications

The school offers a number of subjects that focus on the teaching of Digital Technology. Most subjects taught do involve Digital Technology as a teaching tool that students use in learning, but the Digital Technology subjects focus on the teaching about the use of this technology.

Information Processing and Technology

Information processing theory has been developed and broadened over the years. Most notable in the inception of information processing models is Atkinson and Shrifin's "stage theory," presenting a sequential method, as discussed above, of input-processing-output[2].
