An International Journal INFORMATION PROCESSING & MANAGEMENT

Information processing refers to the manipulation of digitized information by computers and other digital electronic equipment, known collectively as information technology (IT). Information processing systems include business software, operating systems, computers, networks and mainframes.

What is Information Processing? - Definition from Techopedia

Information processing theory has been developed and broadened over the years. Most notable in the inception of information processing models is Atkinson and Shiffrin's "stage theory," presenting a sequential method, as discussed above, of input-processing-output[2].

Information Processing Theory - Learning Theories

The first step in the design process is the problem definition. This definition usually contains a listing of the product or customer requirements and specially information
