

life and death by pdf

Death is the cessation of all biological functions that sustain a living organism. Phenomena which commonly bring about death include aging, predation, malnutrition, disease, suicide, homicide, starvation, dehydration, and accidents or major trauma resulting in terminal injury. In most cases, bodies of living organisms begin to decompose shortly after death.

Death - Wikipedia

Life is a characteristic that distinguishes physical entities that have biological processes, such as signaling and self-sustaining processes, from those that do not, either because such functions have ceased (they have died), or because they never had such functions and are classified as inanimate. Various forms of life exist, such as plants, animals, fungi, protists, archaea, and bacteria.

Here are three universal truths: (1) Life is God because everything is a part of God. (2) Light is God because everything is made of light. (3) Love is God because everything is held together by God. These truths come from people who have had near-death experiences. These same truths come from Jesus, Buddha, Krishna, Moses, Muhammad, Zoroaster, etc..
