Precognition (from the Latin prae-, "before" and cognitio, "acquiring knowledge"), also called prescience, future vision, future sight is a claimed psychic ability to see events in the future.. As with other forms of extrasensory perception, there is no accepted scientific evidence that precognition is a real phenomenon and it is widely considered to be pseudoscience.

In psychology and cognitive science, a memory bias is a cognitive bias that either enhances or impairs the recall of a memory (either the chances that the memory will be recalled at all, or the amount of time it takes for it to be recalled, or both), or that alters the content of a reported memory. There are many types of memory bias, including:
