The genetic modification of animals to obtain transgenic animals started in 1980. The first transgenic animals were mice, which are still the most frequently used transgenic species. About 20 transgenic species have been obtained and they are more or less currently used. Various methods are being implemented to transfer foreign genes to the different species.

Impacts of genetically modified animals on the ecosystem

The FBI's top priorities are national security threats, but the Bureau also continues to play a key role in combating violent crime in big cities and local communities across the United States.
